Symposium on Gas Hydrates and Clathrates

229th ACS National Meeting
San Diego, CA, March 13-17, 2005

Gas hydrates hold promise to become a major source of energy in coming decades. This symposium will highlight the latest progress in this exciting field. Contributions are solicited from researchers on various aspects of hydrates of natural gas, CH₄ and CO₂ hydrates as well as other classical clathrates (guest-host complexes). General topics of interest are: 1) physical properties, 2) occurrences in nature, 3) hydrate formation/dissociation, 4) theoretical aspects, and 5) thermophysical properties of hydrates.

Preprint Preparation: Use the attached template.

Submission: On-line abstract & preprint* submissions are **due by November 24, 2004** using OASys at <http://oasys.acs.org/>

*Preprint is required for participation.

Questions? Contact one of the symposium organizers:
